FAQ

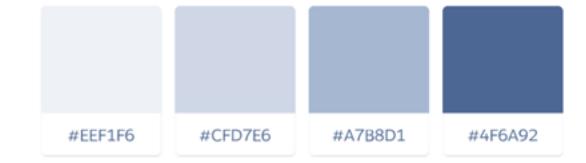

Give Feedback

Salesforce uses a specific color palette to communicate meaning, convey visual differentiation, and provide a consistent look and feel. From neutrals to brights, each hue is chosen to fit into the overall visual language and promote a contemporary and vibrant user experience.

Neutrals

Salesforce uses cool-toned grays injected with a hint of blue to create a lively and modern mood for the interface. In general, color is used sparingly to keep the content center stage and not distract end users.

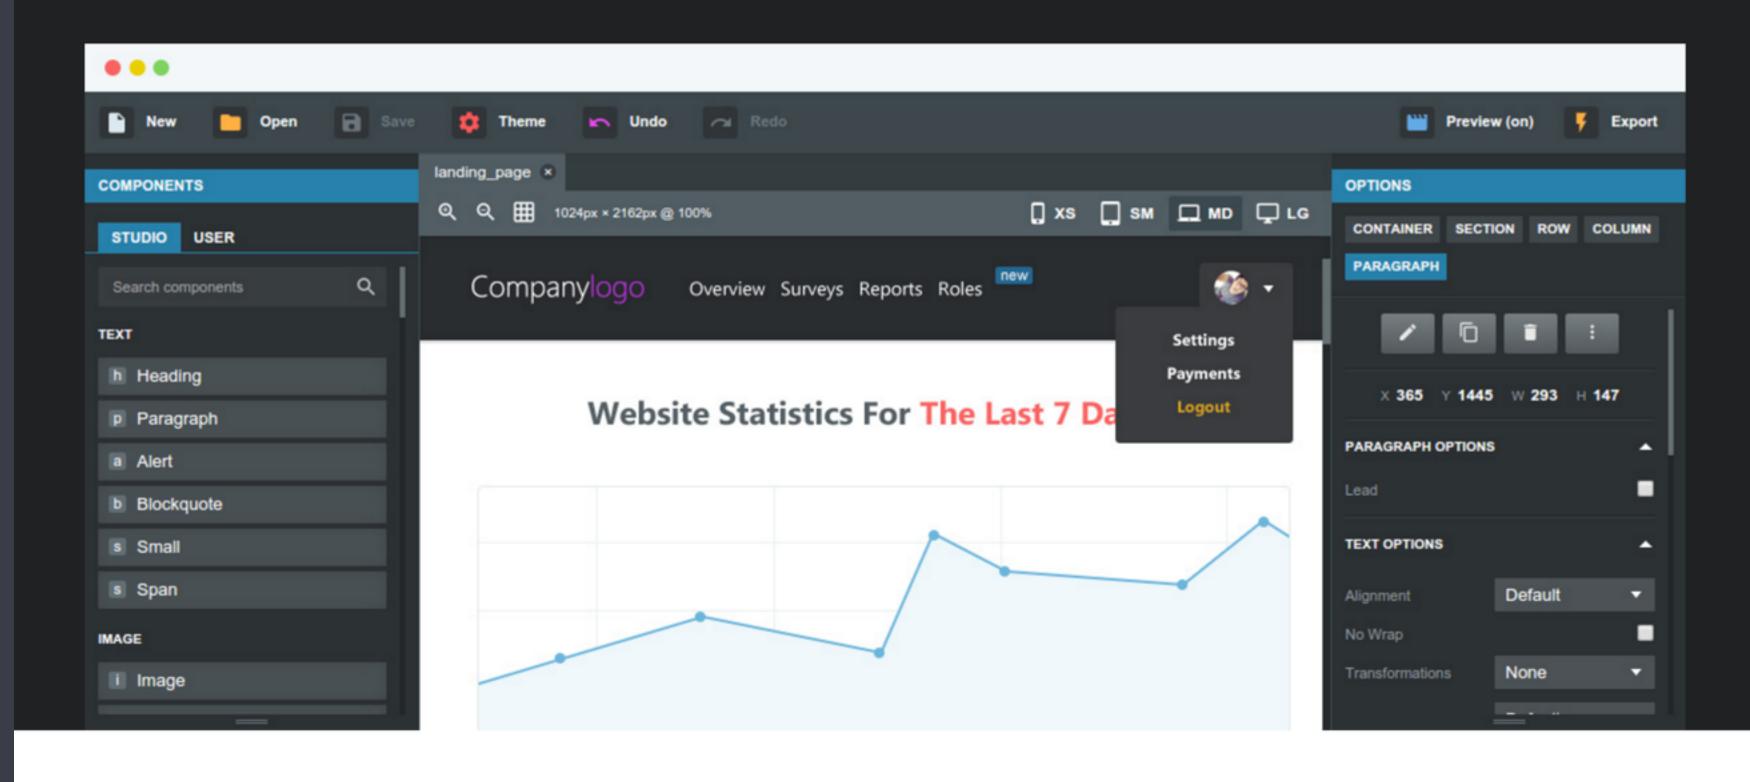

Primary Colors

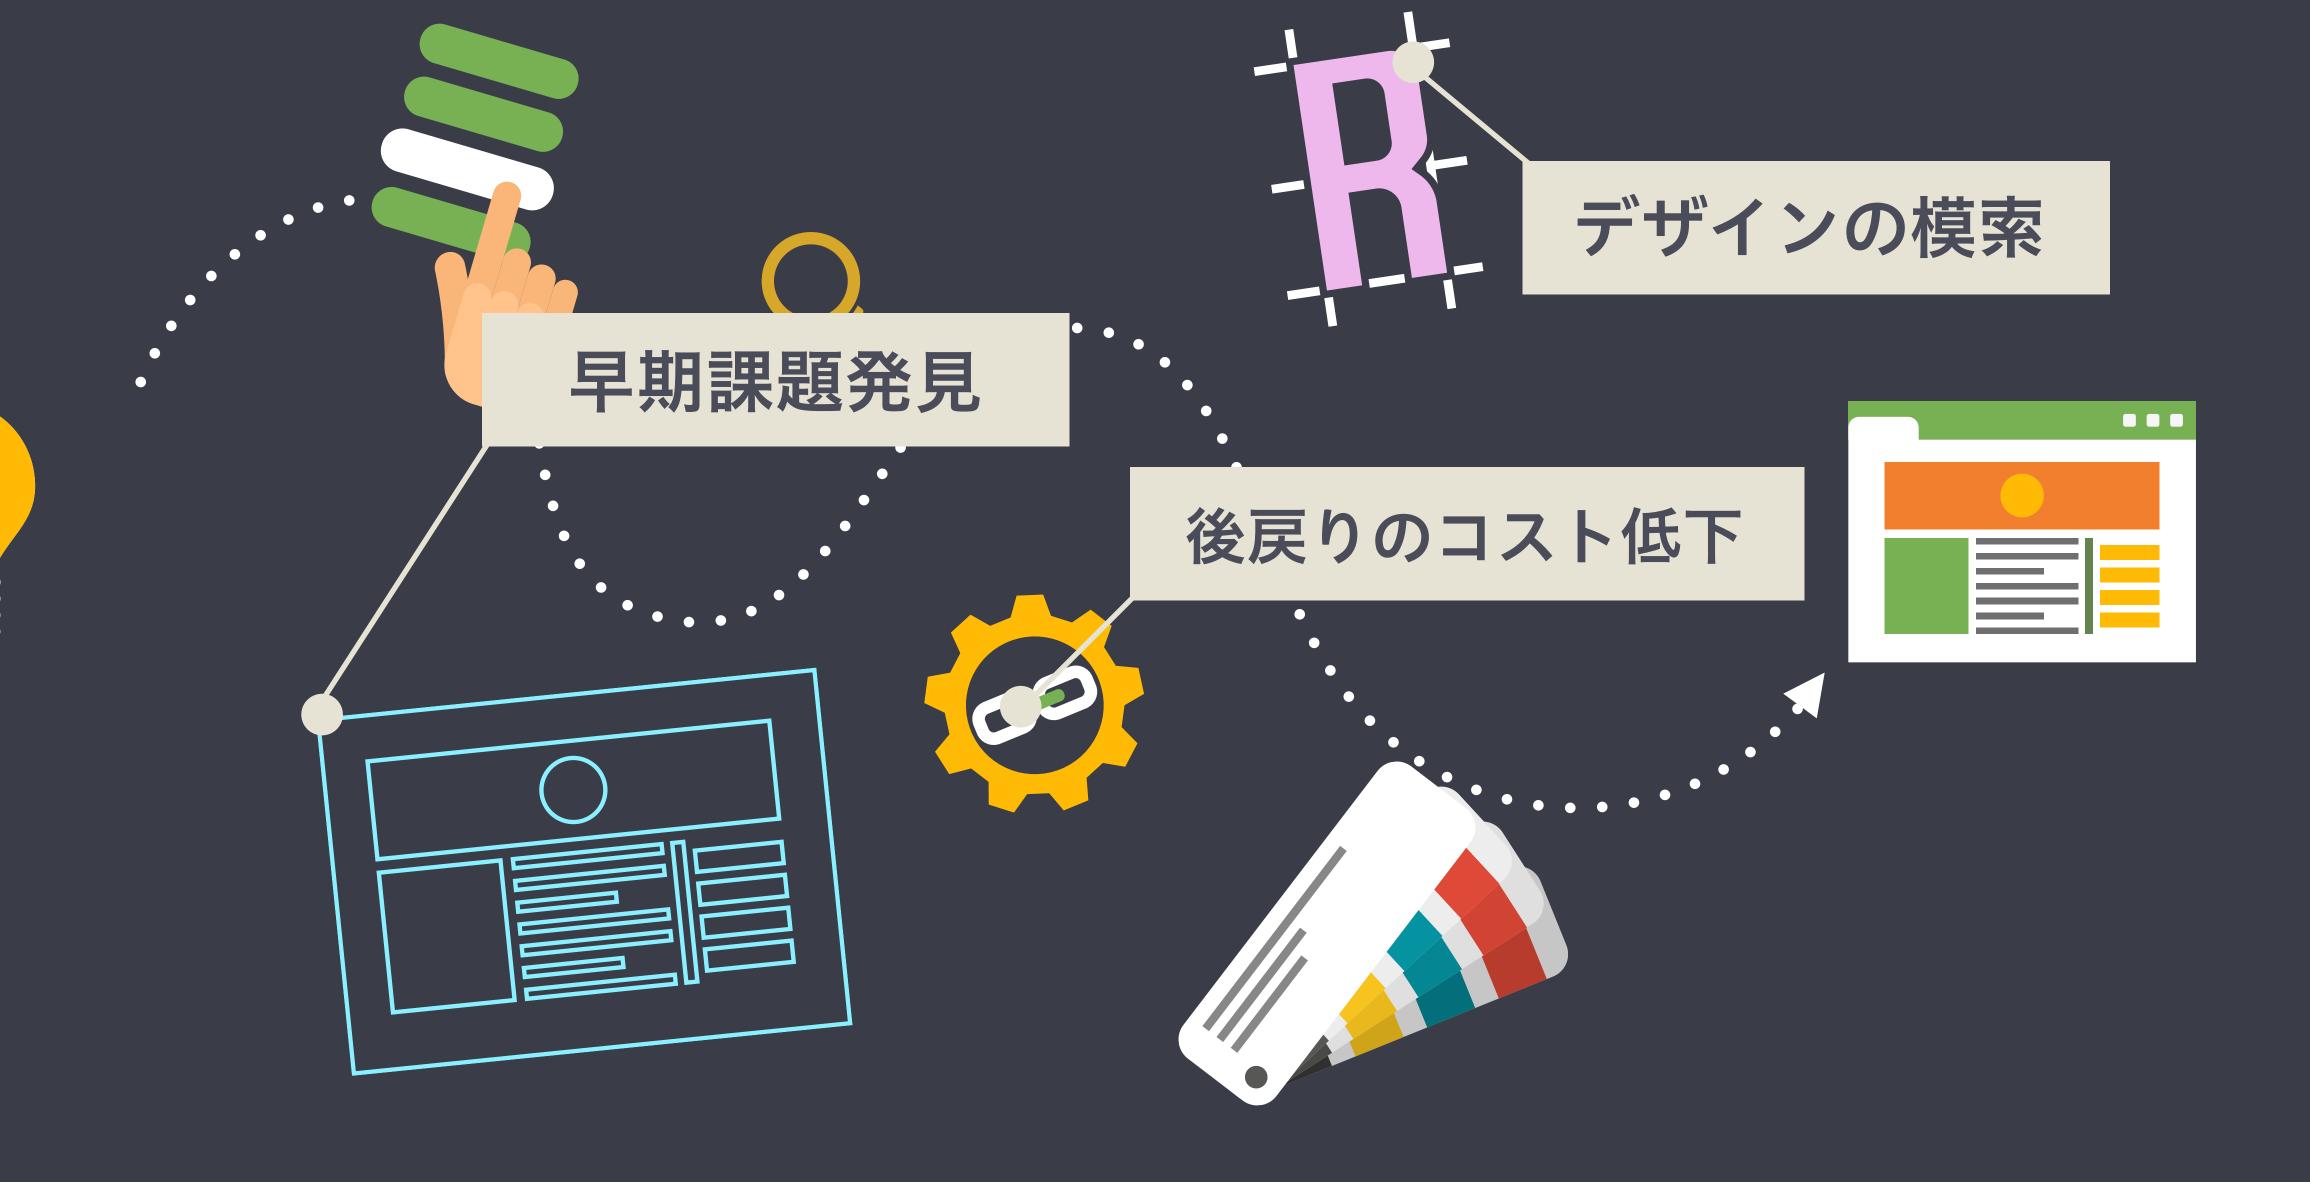

Salesforce's primary brand color is a bright, friendly blue. We also use some darker blues for various other use cases.

Introducing Bootstrap Studio

A powerful web design tool for creating **responsive websites** using the **Bootstrap framework**.
